Peter Coates on the other hand studied environmental change and attitudes in the USA. For people to conclude that a smokey environment is not desirable or necessary, and then decide to try to take action to abate it, they had to counter ideas deriving from smoke's positive associations.

ModernChinaintheAgeofGlobalMigration. The Chimney of the World is a thorough history of smoke generated by the combustion of coal in nineteenth- and early-twentieth-century Manchester, the city John Ruskin called "the spiritual home of smoke" p. Historians of technology may be disappointed that Stephen Mosley does not delve very extensively into the attempts to abate smoke nor into technical explanations of why these were not successful.
