However, some behaviors are unexpected, including a stepwise change of circle area as it is dragged toward the poles. Great condition for a used book! A virtual globe provides easy access to context, especially horizontal context, allowing inferences to be made from the conditions surrounding a location.

The effect on the scientific community was immediate and palpable<sup>2</sup>. This is Ecology and the Human Spirit. Both are captured in the famous principle of Tobler, often termed the First Law of Geography: Who owns geographic information? What is important, of course, is not whether misregistration exists, as it must, but whether it is substantial enough to affect a given application. A similar collaboration among the private sector, academia, nongovernmental organizations, and government, focused on Digital Earth, might be similarly successful.
