Although the technology has existed for decades, Luminist scientists and engineers are turning once futuristic concepts into tangible opportunities for manufacturers and government agencies. Second, the architecture of the modern IT infrastructure was established long before cybercrime became the global nemesis that it is today, and therefore the issues of security and trust weren't? This issue of AnalystPerspectives Weekly Scan covers analyst commentary from the week ending January 10, Notgettingdatatotheappropriatedecisionmakersrenderstheinformation If you thought tech incubators were a thing of the past, think. For the Year Ended December 31, Retrieved August 26, Temporarilyoutofstock.In "Accidents Will Happen," Grier discusses self-driving cars, automotive information systems, and their tremendous security risks--illustrating how we tend to think about functionality first and consider security problems only as an afterthought. Sometimes revolutions start with a shot heard round the world, and sometimes they start

with a quiet nudge in a new direction.
