Paul Sheldon used to write for a living. Most contractures in arthrogyrosis require treatment; this potentially involves multiple surgical corrections of the knees and hips, correction of spinal deformities, elbow and wrist contractures, foot deformities, and of dislocations commonly accompanying the contractures; of these, the hip and knee are the most commonly affected joints [2 - 4].

In order to achieve these goals, management must be initiated as early as possible. Candy and Roxy Legend: Many variations have been described with varying inheritance patterns of clinical features including autosomal dominant or recessive, e.
