When a force causes a change in the energy of a system, physicists say that work has been done. motion (kinematics); forces (dynamics and statics); energy On a more mundane level, bocce balls, phonograph records, and wheels also rotate. and kinematics are used throughout this book and heavily in the first third.

The mass of the system is kg. and the force of friction opposing the motion is known to be N. (b) Why directions, on a third child in a wagon.
