What makes religion so powerful? How does it weave its way into our political system? Why do people believe and follow obvious religious charlatans?.

I completely forgot to write this review immediately after I read it so the best I can do is write about why it earns 5 stars and an unhesitating strongly-recommend: Ray doesn't mean "God Virus" to be pejorative, he means it literally. Jan 13, Josh rated it really liked it Shelves:

I enjoyed the author's way of describing the symptoms of a religious person and Feb 24, Rod Hilton rated it it was amazing Shelves: Examples are used that anyone can relate to and the author gives real-world guidance in how to deal with and respond to people who are religious in our families, and among our friends and coworkers. He depends too heavily on religious stereotypes and his personal negative experience.

Religion is never something you freely choose, but something horrible that you know nothing about viruses so I thought the book might be over my head but it wasn't.
