The title also signals that Kafka is even more complicated than we had thought; that this complication stems from publication history and literary convention does not mean that Kafka's book suffers from it. But nothing breaks the spell of reading like the intrusion of a footnote.

Whatever the degree of completion the text may be in, The Missing Person is a story translated by Northey, Anthony. Like what you read? Because this feeling never wavers, it holds the book together both in the absence and presence of the text. Northey has taught courses in comparative cinema, politics, and literature in Germany, and is presently the program coordinator at the Goethe-Institut Chicago. In shaping Kafka's texts into something publishers would recognize as a formal submission for publication, if not as literature, Brod's work swerves close to the translator's own task of making her or his texts count as literature according to the standards of the language in which the text will appear.
