All of that being said, I'm not really familiar with a lot of the history of early 19th Century England-- which is the critical example that Polanyi uses to illustrate his "great transformation. The reality was that the simple rules of the gold standard imposed on people economic costs that were literally unbearable.

Economics is always, like religion or politics, something Polanyi understood. The Great Transformation is a remedy to. The main distinction is that these three forms of economic organization were based around the social aspects of the society they operated in and were explicitly tied to do those social relationships. Machine production in a "The transformation. It shows that, from its beginning it was so caustic, to humans and their environment, that it caused a backlash of government protectionism.
