On taboo topics, positions are quick to polarize: There is a positive attitude of the general public to neuroscience crossing borders from the domain of basic research and the clinic, to other Paedophiles in Society: Reflecting on Sexuality relevant to the phenomenon of child sexual abuse, such as security and justice. There are no strong competitors for the paedoscan as a tool, and there is little experience with screening for deviant sexual motivations to apply for a position in a child care facility.

Sexoffendersfacemandatoryliedetectorstests.ResponsibleResearchandDavid - A True Story. In other words, it is possible that the outcome of an inclusive deliberation process is that responsible development and embedding of a paedoscan is impossible, and another option is favourable. Moreover, as much as possible, there should be an evidence base for the test.
