The still-developing literacy of adolescents has been less thoroughly studied than that of young children, though some recent work has expanded thinking on this topic International Reading Association and the National Middle School Association ; Kamil et al. The study does not provide details on the nature of these tests. There is little empirical research to demonstrate that teachers who have been taught particular knowledge and skills have students who learn better than . Readingcomprehensionistheprocessofconstructingmeaningfromtext. The kind of data collection and effectiveness research we envision would be focused in particular on preparation related

to the foundational reading skills and the instructional approaches that have been shown to be effective in teaching reading. First, reading comprehension is a complex process that cannot be understood without a clear description of the role that vocabulary development and vocabulary instruction play in the understanding of what has been read.

However, according to a report from the National Center for Education Statistics to main content. This descriptive study often called the TELT study, for Teacher Education and Learning to Teach found considerable variation across the programs with respect to subject-specific teaching of writing.
